FOR YOU AND YOUR FAMILY

## OUR STORY

At NutriBiotic®, we are committed to helping individuals achieve healthier, happier lives by providing innovative, high quality nutritional supplements and personal care products.

Our founding principle that everyone deserves good health, along with the research and recommendations of two-time Nobel Laureate Linus Pauling, PhD, inspired us to produce vitamin C products in both pure and buffered forms. Keeping in mind vitamin C is fundamental to the body and realizing individuals have varying needs dependent on diet, health, and sensitivities, we developed an array of vitamin Cs to fulfill individuals' nutritional requirements.

We also discovered a need for premium, plant-based protein for food sensitive individuals, so we developed a variety of naturally flavored, as well as unflavored, rice protein powders. Our Rice Protein is gluten free, GMO free, and produced without chemicals, pesticides, herbicides, and PCBs.

We later pioneered the use of grapefruit seed extract (GSE), derived from the seed and pulp of grapefruit. GSE is vegan, gluten free, and made without GMOs. You will find GSE in many of our formulas, including dietary supplements and body care.

We are pleased to continue developing an ever-expanding range of quality, cruelty free formulas, created with the intent of supporting your health. We use top-of-the-line raw materials and packaging to ensure freshness and stability. In addition, we are proud to offer a 100% guarantee on our products.

NutriBiotic is a GMP (Good Manufacturing Practices) compliant manufacturer, and we follow a multitude of GMP and stringent quality assurance controls. Our careful attention to detail assures our customers each and every product is produced correctly, batch after batch.

For 43 years and through our constant dedication to deliver quality products, we have gained the respect and trust of thousands of natural food stores, health practitioners, and consumers.
