

Clean Conscience

Simple • Pure • Responsible

NutriBiotic® Coconut Oil Soap is sourced from sustainable, certified organic coconuts. The coconuts are processed without chemicals, to extract pure, virgin coconut oil. The coconut oil is then organically saponified with alkali per the National Organic Program, producing a soap of fatty acids and glycerin, which is blended with citric acid for pH stability. NutriBiotic Coconut Oil Soap is biodegradable and provides a great cleansing lather. Essential oils are added to the scented formulas for a variety of wonderfully refreshing aromas!

**Made with Certified Organic Coconut,
Unrefined & Non-GMO**

Made without: Gluten, GMOs, parabens, and sulfates.
