

NUTRIBIOTIC SUSTAINABILITY STATEMENT

NutriBiotic is committed to continually improving the environment and the cleanliness of our facilities by:

- Reducing waste and recycling
- Using only recycled and biodegradable shipping materials
- Encouraging employees to recycle items and offering incentives from the profits received through recycling
- Reducing energy usage by regulating and monitoring heating and cooling in our storage, shipping, production, and office facilities
- Encouraging employees to take part in the current ride sharing plan to help reduce greenhouse gas emissions and reduce unneeded vehicle expenses

NutriBiotic also contributes to local community and global projects and organizations by:

- Semi-annually donating large portions of unused product to local and/or global charities and food distribution centers
- Consistently contributing to Operation Tango Mike, fire victims, and local events to give back and provide health products to our Armed Forces and neighbors
- Maintaining a spring/summer work garden from which the produce is used to make meals for employees and encouraging anyone to take home to share with family and friends

NutriBiotic feels we are contributing to making the world a greener and happier place for us all by providing our customers with quality products, having good recycling and waste practices, and helping support global and local communities and organizations.
